Positioning Tips

SIGNAL	SUGGESTED ACTION
USD Index strengthened +0.79% this week	A stronger dollar weighs on multinational earnings and commodities. Consider reducing exposure to export-heavy sectors and commodity ETFs (GLD, DJP).
Housing Starts missed at 1.37M vs. 1.42M	Affordability pressure weighs on homebuilders (ITB, XHB). Watch mortgage rate trajectory before adding real estate exposure.

Services PMI missed at 49.7 vs. 53.0 expected	Services sector contraction is a caution signal. Consider trimming consumer discretionary (XLY) and adding

	defensives (XLP, XLU).
GDP release on 2026-02-26	A weak print could shift sentiment toward defensives (XLU, XLP); a strong beat supports risk-on positioning in cyclicals (XLY, XLI).
PCE Price Index on 2026-02-27	The Fed's preferred inflation gauge. A hot print could reprice rate-cut expectations; consider hedging bond duration (TLT) and adding inflation protection (TIPS, GLD).
